

Very simple procedure with wonderful results!
Why didn't I do this sooner?

Lela Layla Aukes  แนะนำ SuperSight Surgery

30 มกราคม · 

14 years ago we had super sight surgery done by Dr Somchai at Bangkok Pattaya Hospital and we stopped in to say thank you. So grateful all is still great . We are so happy that we had this done here 2006.

THE OPERATION WAS ONE OF THE BEST DECISIONS OF MY LIFE. THE PROCEDURE WAS QUICK, PAINLESS AND PRODUCED IMMEDIATE RESULTS. I FELT SO POSITIVE AFTER THE OPERATION THAT MY LIFE WAS ENHANCED.

TODAY, 14 YEARS LATER, I HAVE NO REGRETS AND ENJOY THE SAME LEVEL OF VISION. I WOULD RECOMMEND THIS PROCEDURE AND MY SURGEON TO ANYONE. I FOUND HIM MOST REASSURING AND I ALWAYS HAD 100% CONFIDENCE IN HIS KNOWLEDGE AND SKILL.

Unbelievable, the results speak for themselves, a wonderful brilliant DOCTOR someone 12 years ago I threw my reading glasses away. I can read the smallest print/writing with no issues I recommend Doctor Somchai to anyone who wears glasses. Never mind the expense it is worth every cent/baht. Thank you for everything.

ON MAY 1, 2006 I HAD SUPERSIGHT SURGERY PERFORMED BY DR. SOMCHAI.

IMMEDIATELY AFTER THE SURGERY I WAS ABLE TO SEE CLEARLY WITHOUT MY GLASSES. IT IS UNBELIEVABLE.

MY VISION WAS RESTORED TO 20/20. PRIOR TO THE SURGERY I COULDN'T EVEN SEE THE VISION TEST CHART WITHOUT MY GLASSES LET ALONE A SINGLE LETTER ON IT. NOW I CAN SEE EVERYTHING ON THE CHART CLEARLY WITHOUT ANY VISION AID.

WHAT I WAS MOST PLEASED WITH WAS THAT DURING THE OPERATION I EXPERIENCED NO PAIN OR BLEEDING WHATSOEVER. DR. SOMCHAI AND HIS TEAM WERE EXTREMELY ORGANIZED AND PROFESSIONAL DURING THE ENTIRE SUPERSIGHT SURGERY PROCEDURE.

NOW WHEN I SEE SOMEONE ELDERLY WEARING CORRECTIVE EYE WEAR I WANT TO TELL THEM ABOUT DR. SOMCHAI AND HIS SUPERSIGHT SURGERY. I KNOW FOR SURE THAT ANYONE WOULD BE PLEASED WITH THE OUTCOME.

I WAS SO PLEASED WITH MY OUTCOME THAT I HAVE ENCOURAGED MY WIFE TO HAVE HER EYESITE RESTORED TOO. SHE WILL BE COMING TO THAILAND FROM THE USA TO HAVE SUPERSIGHT SURGERY AT THE END OF THE MONTH.

THANK YOU DR. SOMCHAI AND BANGKOK PATTAYA HOSPITAL FOR CHANGING MY LIFE FOREVER.

THE COLOURED LIGHTS SHOW

When I decided on the Supersight procedure at Bangkok Pattaya Hospital there were a few things I didn't know. What I did know was that Dr Somchai was the best in the business. There were plenty of surprises during my 24 hours in the hospital.

Firstly I was impressed with the way everything flowed so smoothly, no doubt the result of many Supersight operations. I was amazed how many times my name, date of birth, temperature and blood pressure were checked.

I was also fascinated by how I was trussed up for the procedure. After being eased into a 'dentist's chair' my head was swathed in translucent blue plastic bandages, but loose enough to breathe normally. After being reassured that I wouldn't feel anything I declined a partial anesthetic. Next Dr S. cut a small slit in the plastic to access one eye. As a big mechanical arm started hovering over me he simply said 'look at the light'.

Wow! A very clear beam of white light speared into my world of darkness. It was never still, rather shifted and moved around, bringing with it very bright rainbow colours and everything in between, dancing, shimmering, swirling, swaying. I had a grandstand view of the birth of the universe, stars forming, growing, dispersing. Yes I was in the hands of light angels, nothing could go wrong. So no surprise when Dr Somchai put his tools of trade down and whispered in my ear 'This eye is finished and there were no complications.'

Another discovery. At that stage when I looked up to see Dr Somchai hovering over me, one image of him was bright and colourful, the other dull and 'beige'. I didn't realise until then the extent of the negative effect of cataracts on my sight.

It is a week now since the operation and everything has gone smoothly. My thanks to Dr Somchai, his team, and the angels, for bringing so much extra light and colour into my life. And to my biggest supporter Maggie for being with me every inch of this incredible journey.

SUPERSIGHT SURGURY FOR ME WAS QUICK AND PAINLESS WITH FANTASTIC RESULTS. IF YOU ARE THINKING ABOUT SUPERSIGHT SURGURY, DON'T THINK, DO IT.
JOSEPH WORTHINGTON.

I heard about SuperSight Surgery (SSS) last year at the Royal Garden Plaza. I didn't understand, and thought this was Lasik. Later I looked up SSS on the internet and realized this was very different. This could help my reading and close vision.

During the past year I researched various surgeries and IOLs. I was interested in what SSS could provide. I emailed Dr. Somchai and was pleased to receive his reply. After a few emails an initial appointment was set.

Dr. Somchai is a pleasant man. His team/staff are knowledgeable. After some interesting vision tests I was led in to see Dr. Somchai. We discussed procedures and implants, and he recommended a specific lens for my needs. Two days later I was in surgery. Today is one day later, and I am seeing both near and far very well. Dr. Somchai says this will improve in time.

I am pleased with Dr. Somchai, his staff and Bangkok Pattaya Hospital.

Thank you!

Back to work now, was sad to leave Jayne Speakman, it's her big day today. She's having her supersight surgery. Very nervous for her but if it means she will never need glasses again then it's worth it. Very excited for her. She will head to the operating room at 12 noon today. Good luck Mum, I'm thinking of you... no pain no gain... 'SEE' you later alligator 🙄😁❤️

Tired of reading glasses or bifocals ?

... This client's wife, is so delighted with 'the miracle' of her previous Supersight Surgery with us, they both joined us in July for a holiday & her husband's Supersight Surgery. Marveling at being able to read without his glasses the next day, he read out the tiniest writing on his watch to me.

When I came here it was on recommendation of a friend. I had been to Bumengrad Hospital in Bangkok who would not undertake the corrective surgery. Doctor Sanchez expressed high confidence it could be done. I experienced minor discomfort during a part of the operation only. My expectations were to be able to read and write without glasses. Doctor Sanchez conditioned my expectations but he is a doctor who would rather under promise and over deliver. He did this!! Within 20 hours I was texting my wife without glasses!! Hospital care was faultless. Early days but based on my experience to date highly recommend.

I had a very positive experience with Dr. Sanchez @ Rkt Hospital in An Hays. Of course I was scared going into the surgery to replace both lenses w/ 20/15 lenses. However, the next day my sight was better than 20/15. I was so excited! No more glasses for distance and for reading. Just like a young person.

I would recommend this surgery to any one who qualifies.

Before finding out about Supersight Surgery I was resigned to accepting that I would need both reading and distance glasses for the rest of my life. After investigation of the process and discussion with Dr. Somchai I decided to go ahead with the operation. The results have been beyond my wildest dreams & I was no longer need glasses, my only disappointment being that the process was not available 50 years ago!

Throughout my treatment I have been amazed by the efficiency of all staff involved and the level of kindness and care extended to me. Prior to the operation, every aspect of the procedure was explained to me in detail. The operation itself was painless and, if I remember correctly, completed in about an hour. Thereafter, I was glasses free, sitting up in bed immediately after the operation, reading a novel.

In the one year since the operation I have been cured for via several follow up visits to Dr. Somchai who at every stage has done his absolute utmost to assure that I have understood how my eyes have adjusted after the operation. I can say that everything about this process has been wonderful & that I am entirely satisfied with the outcome.

Al M^Cewan

MY EYESIGHT WAS DEGRADING RAPIDLY, SMOKEI BLURRED VISION EVEN WEARING PRESCRIPTION GLASSES. I HAD 5 PAIRS OF PRESCRIPTION GLASSES. I CONTACTED SUPER SIGHT FOR AN APPOINTMENT TO UNDERSTAND THE PROBLEM WITH MY EYESIGHT. I FOUND THAT ALL STAFF AND DR. SOMCHAI TO BE VERY PROFESSIONAL AND HELPFUL.

I HAD THE LENSES INSTALLED IN BOTH EYES. AMAZING. I COULD SEE CLEARLY AND THE COLOURS RETURNED TO MY VISION.

I NO LONGER NEED TO WEAR PRESCRIPTION GLASSES.

THANK YOU TO DR. SOMCHAI AND TEAM FOR YOUR EXCEPTIONAL SERVICE RESULTING IN AN EXCELLENT OUTCOME - RESTORATION OF MY EYESIGHT.

MR Michael K Bailey DOB 25-09-1956 Patient of
Dr. Somchai T Eye Surgeon, Bangkok Hospital Pattaya
My Testament to Anybody who is Contemplating Supersight Eye Surgery

On Monday 20th November 2006, I was in the Bangkok Hospital Pattaya to get an injection of cortisone to treat tennis elbow in my left arm (to much bad golf).

After being treated at a very reasonable cost I decided to investigate Laser Eye Surgery which I had read so much about. I went into the eye department of the Bangkok Hospital Pattaya to arrange an appointment with an Eye Surgeon. On arriving there all I could see all around me where signs for SuperSight Eye Surgery.

I asked the receptionist what SuperSight Eye Surgery was, I was given a booklet on the procedure by the receptionist who also informed me that this was the latest technology in Corrective Eye Surgery, the actual lenses of the eye is replaced by new silicon lenses. This fascinated me because I'm a bit of a techno freak anyway and so I arranged an appointment for the following day.

So on Tuesday 21st November 2007 at 11.00 am. I went for my Consultation with the Eye Surgeon Dr Somchai T. He explained to me what SuperSight Eye Surgery is. I asked when it would be possible have to the operation carried out and he told me that I could be accommodated later that day as he had a gap in his schedule.

A funny thing **(to me anyway sitting there in shorts and T shirt)** was then raised by him, **did I have the funds to pay for the treatment with me.** I didn't even have a toothbrush with me. But at least I did have my wallet and debit card with me. When my debit card proved that I had sufficient funds all was satisfactory.

There then followed a flurry of activity with eye drops every 10 minutes or so, chest x-rays, blood tests, and various other samples being taken (it reminded me of a Sci Fi film with my every move throughout the hospital being monitored and I was escorted everywhere by a beautiful Thai lady.

Well the upshot was that within 4 hours of first meeting the surgeon I was there in theatre having the operation completed in about 1 1/2 hours from Start to finish all under local anesthetic. I even have a photograph album, DVD and pardon the Pun even a T shirt of the whole experience

When Dr Somchai T first examined me at my initial consultation, he thought at best 30% vision improvement in my Left eye was the maximum possible. As I have never really been able to see that well with my Left eye for as long as I can remember way back until about age 3 to 4 years old, so any improvement would be better than what I have been living with for most of my life.

He also said that both of my eyes would need my brain to work in harmony to get both eyes working together for the full effects of the SuperSight Surgery to work.

After a good nights sleep and by the next morning I was able to read (a little blurry) the smallest of writing in the financial pages of the Bangkok post (though it was in English) **if I could have read it in Thai then that would have been a miracle as I can hardly speak or read a word of Thai anyway**

After 1 week my Left eye was recorded at 60% and my Right Eye 90% vision Well after 3 weeks and my final consultation with Dr Somchai T before flying home to the UK. I had 85% vision in my Left eye and 95% vision in Right eye. So I now have 20/12 vision or 1 1/2 times better than 20/20 vision or I can now read row 14 (3rd from bottom row) on a standard eye test board and row 16 (bottom row) with my Right eye all through SuperSight Eye Surgery, and the truly Remarkable Dr Somchai T, to whom I'll be indebted to for the rest of my life.

Dr Somchai T has told me it is a phenomenon what has happened to my eyes and I'm his best patient to date. It is now the way to go rather than laser treatment as new lenses are fitted and also during my operation Dr Somchai T also corrected my Cornea's back to Round from Oval. For the rest of my life I will never ever need to wear glasses again and can now enjoy my true passion **Motor sport** with the need for over glasses goggles now... completely gone.

**My Superlight
Caterham 7
R500
Weighing 460
Kilos with
power @ 255
BHP
@ 8600 RPM
= 562 BHP per
Tonne and 0-
60 MPH 3.2
seconds**

All this for a total sum of **£2434.00 for both eyes to be treated** which included an overnight stay in one of the nicest suites that I have ever had the privilege to stay in with the nursing aftercare second to none. I'd say the Best Money I have ever Spent.

I was told at the Bangkok Hospital Pattaya that Dr. Somchai T and his team uses 96% of the world supply of lenses which are made in Germany. I've said it before and don't mind repeating again that I feel I will be indebted to him and his wonderful team for the rest of my life.

To Dr Somchai T & Team
Many Many Many Thanks
Michael K Bailey

8 JUNE 2006

Supersight Surgery has become a dream-come-true. I have worn glasses for distance since age 12 — that is 50 annoying years! In my late 40's I graduated to bifocals.

Over the years I have tried contact lenses back when they were huge plastic saucers, continuing with all of the "upgrades" over the years, including weighted bifocals, two different lenses, and disposable lenses. But no matter how technologically advanced I was led to believe they were, I constantly had problems with them and would always give up and return to my glasses.

I was rejected several times for various Lasik procedures due to my need for bifocals and an astigmatism.

I have constantly scanned the media for news of new procedures that would solve my eyesight problems.

When I saw the promotional material for Supersight Surgery I was skeptical since I was admittedly prejudiced about trusting my eyes to a "foreign" hospital.

After visiting the Pattaya Hospital facility and speaking with Dr Somchai, every reservation I had was gone. Dr Somchai did an AMAZING job of explaining the entire procedure as well as the

technology that would make this miracle possible.

The entire procedure was wonderful. The kind, efficient, and attentive nurses made me feel comfortable, confident, and welcome. The actual surgery was completely painless and simple. The results were immediate.

I can now see as well as I did when I was a young child. Good lighting seems to be very important for reading very small print.

I will be going back to the United States soon and will most assuredly become a walking billboard for this amazing miracle! I have already emailed many friends, urging them to consider this procedure.

I want to express my sincere thanks to Dr Somchai, his staff and the Pattaya Hospital for a truly wonderful experience.

Sincerely

Carole A. Foss

I came into OR and felt good.

After operation , everything was wonderful.

I felt like born again.

A new life could begin , I could see and felt no pain.

I was very happy.

Mrs. Gertraud Kaufmann

Switzerland

Dear friends at the supersight center,

Many thanks for the latest pix..

I just wrote my experience and posted in facebook – under my timeline (christel pilz)

<https://www.facebook.com/photo.php?fbid=10201370498884159&set=a.10201370500604202&type=3>

Please pass on the Dr. Somchai.

He is welcome to use wherever he like to use.

I was asked by many friends about my experience.. and here it comes.

Feel better today after the removal of the crystal corns in my eyelids.

See you again Febr. 27.

Best wishes to you all and many thanks,

Christel

So posted in FB: Not PR, but personal experience,
sharing for those who want to know.

Please read the text below in full:

Supersight vision? Tired of glasses – for distance, for reading, for computer and regular trips to the Optician to change the lenses? For me, all started with a trip to the Bangkok Pattaya Hospital, which has become known worldwide for its the Supersight Vision department, headed by Dr. Somchai. I remember Dr Somchai, when he did the Cataract surgery for my mother 16 years ago as a man who radiates gentle friendliness and who impressed me, how carefully he touched the eyes of my mother and how he took her fear as she had passed the eighties already. Dr. Somchai told me, that the miracle of the eyes was his passion and he was searching for ways, how to restore eyesight to never have to use glasses again. He went to Erlangen in Germany, joined a team of Scientists of Zeiss, a renowned German company for lenses and vision care.

Now, 16 years later, I met Dr. Somchai again. I asked for a checkup and consultation. He still has his boyish smile, his gentle touches, his humble way of explaining while using a row of high tech machines, all blinking in different colors when moved to the eyes. Before that, Ms. Wanida, his assistant of 20 years, had already checked with another array of high tech tools and equipment. I was reminded of my time as a war correspondent in Vietnam – so very long ago – when I had the privilege to spend 3 days on the first nuclear driven aircraft carrier, the USS Enterprise, where the whole inside of the ship was equipped with blinking, moving and radiating screens and gadgets, glittering in mostly purple and violet colors. For me world of Utopia – and on top of this my life's record: 6000 men and me, me being the only woman on board! Never was I anywhere more safe. I still have nothing but praise and respect for the crew on board.

Dr. Somchai explained, why my eyes did not want to focus on what I wanted them to focus on. Strong Astigmatism in the left eye and both eyes showing signs of Cataract in addition to having different vision in the left and right eye. In his gentle way Dr. Somchai mentioned, that this surgery is quite expensive and looking at the equipment and imagining the research and training it took and takes, I understand. Cost in Thai Bath ranges between 230 000 to almost 300 000 Baht, which according to the present exchange rate to Euro is about 8000 to 9000 Euro. Lucky I am that my Insurance "Allianz" agreed to cover the cost 100 %. I was told, the Surgery will be done after several general checkups, local anesthesia injection above the cheekbones, so that I will feel nothing. The surgery will take one hour for both eyes and thereafter I need to stay in the Hospital overnight. I should not be worried. Dr. Somchai has done more than 1500 such surgeries for Patients who come from all over the world. More one can read in his web site: <https://www.bangkokpattayahospital.com/.../lasik-and-supersig...>

I decided to go for it and was told to come to the Hospital the following Sunday at 7.30. All started with bloodpressure checks , repeated eyedrops, blood and urine test and lung X ray. Then I was moved to a luxury hospital room on the 12th floor, letting me have a beautiful view of Pattaya and the sea. But I felt drowsy and slept until I was awoken and in a wheelchair driven to the operation room, another site of Utopia with huge lamps and microscopes. I noticed the Name Leica. It was 11.00 am. Dr. Somchai injected the Anesthesia to paralyse pain and eye movement and other calming down medicine other into the needle which had been placed in my hand. Thereafter I do not recall what happened though I was still aware of sounds. I heard a scratching sound and after a while I heard Dr. Somchai saying, the right eye is done. All went well. Then came the left eye. The one with strong astigmatism, for which a special lens was needed. Now I saw flashes in bright yellow and also red . I did not hear scratching sounds. May because I was singing as Dr. Somchai told me. I vaguely remember. I have this habit to always sing when I drive , singing in a language I do not know though I usually know the meaning. It is always about Life, humans being the microcosm of the macrocosm. .

After the left eye was also done, and had gone well ,Dr. Somchai asked me to open my eyes and said, I may see him double. I could open only my right eye. The lid of left eye stayed closed. Also I did not see Dr. Somchai as two. He laughed, told me not worry and that I will be able to open my left eye after the effect of the Anesthesia is out.

I then was rolled back to my room on the 12th floor. Was still worried about my left eye lid, but then I slept for 5 hours and when I woke up both eyes opened – no pain! I could see all around me.. well focused.. and I feel asleep again. Next day. Check up, all is fine. What was different were the colors. The green of the trees was like being covered with a blueish grey shield and my eyes were very sensitive to light. I was given big sun glasses, closed on all sides and told, to wear them when I am outside or at a bright place, also I should not read longer than 20 minutes, often blinck my eyes and rest for another 20 minutes before reading again and use bright lamps when reading. But Best to keep resting the eyes and brain.

Dr. Somchai had explained, the brain will have to adjust and later I would see the colours as they really are, not as distorted as before- though they had looked fine to me. The brain will also have to adjust to reading and seeing without glasses- and as I realize, I also have to control my arm movement, always wanting to grab my eyeglasses when I was going to read. Monday noon, one day after the surgery, I could check out and had no problem to drive the 20 km back to my house at the beach.

Back home, I rested and read the instructions I was given, how and when to use the 2 kinds of eyedrops and that for the first two nights I should be sleeping with a cover over the eyes. I was happy, but the left eye was hurting with a scratching sensation. I remembered, long time ago an eye doctor told me, I had a little calcium spot inside my left upper lid and I should not scratch. But I never had any problem since. Now I had. I went back to see Dr. Somchai, indeed there was a calcium spot. He removed it with a needle, safely guided by his gentle hands and told me to use drops for dry eyes – as often as I feel for it.

It now is two weeks since I had this surgery. The colors are back. Green is green. Just blue is still too much blue, but the sky is as it was before and red is red.

Reading still strains my eyes and I need many breaks and more sleep than before. As Dr. Somchai told, it will take at least one month for the brain to adjust and the eyes to feel comfortable. But for some patients it may take a longer time. so I just practice patience, not being a youngster any more. By the way, such surgery can be done for youngsters as well but not before they turn 18 or 20. I am writing this text for all those, who might consider to have such super vision eye surgery and do not do because of worries. If you can afford and are tired of using different glasses for this and that, rethink.

Go for consultation, feel your Inner voice and then decide.

Such surgery is now available worldwide and also at other hospitals in Thailand, but whether it is the same I do not know. As for me, I trust Dr. Somchai and feel deep gratitude for the chance and Blessing I received

-- to see the beauty of our earth and the love in the eyes of pure hearted people.

From a friend I learned about Super-sight Surgery, performed by Dr. Sandrai at BHP in Pattaya. Per e-mail I received more info and the schedule for my surgery. On arrival everything was very well organized and I felt very welcome and taking care of by the friendly staff. Dr. Sandrai discussed my case in every detail with me and only 1 day after OP I was able to see and read as maybe 20 years ago. I am so happy with my eyesight and

can only thank ~~you~~

all the team at BHP and Dr Sandrai. I will recommend them to all my friends in Germany!
